Tabelle1

defaultvalues String ID of the craft name.

0 Maximum amount of fuel this craft can carry. Crafts use up fuel based on their speed while travelling.

0 Maximum amount of damage this craft can take. If this amount is exceeded, the craft is destroyed.

0 Maximum speed in nautical miles. Crafts travel at max speed when flying and half speed when patrolling.

0 Aceeleration value shown in the UFOpaedia.

0 Amount of craft weapons this craft can equip. The UI can only display a max of 2 weapons.

0 Amount of money spent for purchasing this craft. If set to 0, the craft will not be available in the Purchase/Recruit screen.

0 Amount of money spent monthly for renting this craft. If set to 0, the craft is not on rental and won't count towards base maintenance.

0 Amount of money gained for selling this craft.

0 Item required for refuelling this craft. If no item is specified, the craft uses human fuel.

1 Amount of damage restored every hour while Repairing in base.

1 Amount of fuel restored every 30 mins while Refueling in base. If specified, a refuelItem is spent each time.

600 Detection range of the craft's radar in nautical miles. Every craft radar has a 100% detection chance.

0 Number of hours it takes to purchase/transfer this craft to a base.

0 Score lost when this craft is destroyed.

false

Can this craft go to Cydonia?

lasercannon= 61,0

Normal fuel consumption varies = depends on speed
